HONR 490.601

Thesis Preparation

Andrew Martino • Hybrid • M 5-5:50 p.m. • AC302

In Honors 490, students begin work on their theses and select a thesis committee comprised of a thesis advisor and two readers. The mentor and one reader are chosen from the student's major department. The other reader is selected from faculty in one's school. Additionally, students conduct preliminary research on their topic and write a prospectus (which must be approved by their committee) describing what they hope to accomplish in their thesis. In addition to meeting as necessary with their mentors, students meet regularly with the instructor to discuss progress and problems. Students should plan to enroll in HONR 490 during a semester prior to completing the actual thesis.

HONR 495

Honors Thesis

TBA – Individual Faculty Mentors

The Honors Thesis is a three- or four-credit, focused, in-depth project in one's major field. What distinguishes an Honors Thesis from a research paper in a regular classroom is the willingness of the student to go beyond the classroom and assume the responsibilities associated with commitment to scholarship.

HONR 496.750

Honors Thesis Consultation

Andrew Martino • Remote - Synchronous • T 6-6:50 p.m.

This series of workshops is designed to aid students during the semester in which they are finishing their thesis research. Students are required to attend all sessions and submit their Honors Thesis to the Honors College for fulfillment of their honors requirements.

Lifelong Fitness and Wellness

Susannah Taylor • F2F • T/TH 9:30-10:45 a.m. • Location TBA

The Lifelong Fitness and Wellness class covers topics including the components of fitness, nutrition, chronic disease prevention, social relationships and stress management within the framework of the dimensions of wellness. Students have the opportunity to critically evaluate and discuss current research related to the ever-changing fields of health and wellness. Aside from covering the topics in a global sense, students take an inventory of strengths and areas in need of improvement in their current lifestyle and participate in assignments and activities designed to promote wellness. Students also have access to a University-supplied heart rate monitor/activity tracker for use throughout the semester.

- Meets General Education V

Applied Leadership

Ryan Weaver • Hybrid • M Noon-12:50 p.m. • SG131

What if the pervasive tension of change was a good thing for organizations and leaders? This course offers a broad look at the dynamics of organizational culture, organizational change and organizational effectiveness through the lens of a narrative approach to leadership. Students build on the lessons of their personal leadership narrative to incorporate experiential aspects of organizational leadership and the necessity for strategic individual growth. Students define observable and repeatable characteristics of organizational leadership and are equipped to recognize the dynamics of organizational culture through collaboration with a local nonprofit organization. By the end of this course, students explore and communicate a narrative approach to organizational leadership and develop interdisciplinary skills for assessing and leading an organization through the crisis of change.

- This is a hybrid, two-credit hour course
- Priority enrollment given to students in the Sophomore Honors College LLC

ENVS 102

Introduction to Sustainability

Michael Lewis • F2F • T 11-11:50 a.m.; TH 9:30 a.m.-Noon • Location TBA

This course examines the experiential effects human activities have on the environment. Field trips may include aquaculture facilities, commercial fishing operations, factory farms (of both plants and animals), organic farms, large-scale composting operations, sewage treatment plants, pine plantations, chip mill, and power plants.

- Three hours per week with enhancement
- Meets General Education IVB
- Priority enrollment given to students in the Honors College LLC #5: Food Politics: Sustaining Communities

3-D Printing/Digital Product Development

Gene Hahn • F2F • MW 5:30-6:45 p.m. • Location TBA

This is the class where you create the future! Every day, entrepreneurs are turning creativity and know-how into profit on platforms like Kickstarter and IndieGoGo. Powerful technological developments including 3D printing and the Internet of Things are expected to greatly change businesses and society in the coming years. In this student-visioned class, you design and produce your own electronics product using 3D printing and the Arduino microcontroller platform. You introduce your functioning product to the Salisbury University community by way of presentations. The class assumes no prior knowledge with either 3D printing or electronics product development; however, one semester of computer programming (or equivalent as assessed by the instructor) is a required prerequisite. Let's talk about what computer language you program in. Honors students gain increased experience with our dual-material 3D printing.
